

**Assignment 2 | E-Commerce Case Study**  
**Saurav Kumar (21f1003694)**

You are provided with the following data for analysing the Cochin DC:

- i. **sku\_master**: It contains information of BU, SKU, Brand, Model and Average Price
- ii. **sales\_data**: It contains information on Date, SKU, City and Volume
- iii. **opn\_stk**: Stock that is available as on 01-04-2021
- iv. **cochin\_stk\_trans**: Contains information on incoming stocks to Cochin DC from 01-04-2021 – 15-04-2021.

Using the provided data, answer questions 1 to 9. Support your answers by pasting the necessary graphs and tables as pictures (when mentioned in the question). In addition to this document, submit the excel file, where you have performed the analysis.

1. **Create a Revenue Pareto Charts for Cochin DC. Show the Pareto table that has the top SKUs contributing to approximately 80% of the total revenue.** *Hint: Pareto chart should have primary axis in rupees, secondary axis in percentage. The table should have the following columns: SKU, Revenue, Cumulative Revenue, and percentage.*

**Assignment 2 | E-Commerce Case Study**  
**Saurav Kumar (21f1003694)**

SKU	Revenue	Cumulative Revenue	% of Total Revenue
M10	2880000	2880000	14.66%
M07	2842000	5722000	29.12%

F05	17860	19631821	99.92%
F08	15000	19646821	100.00%

Assignment 2 | E-Commerce Case Study  
Saurav Kumar (21f1003694)

2. Create a single scatter plot for Cochin DC and show the scatter chart between volume and revenue. Identify 2 outliers, one in terms of revenue and the other in terms of volume (write down their values).

*Hint: If your revenue outlier is L01, write L01 (10,00,000 INR), and similarly if your volume outlier is F05, write F05 (350).*

- a. Revenue outlier: M07 (245000 INR)  
b. Volume outlier: F01 (32)

SKU	VOLUME	REVENUE	SKU2	VOLUME3	REVENUE4	SKU5	VOLUME6	REVENUE7
M01	16	192000	L01	11	3850	F01	14	4200
M01	12	144000	L01	14	4900	F01	30	9000

M10	4	240000				F10	4	3996

3. Draw a line graph to identify trends with respect to volumes observed in the 15 days sale in Cochin DC? On 09-04-2021, how many units were sold?

Assignment 2 | E-Commerce Case Study  
Saurav Kumar (21f1003694)

*Hint: Use data labels*

Answer: 200 units

4. Draw a line graph to identify trends with respect to revenue observed in the 15 days sale in Cochin DC? On 03-04-2021, how much revenue was generated?

Answer: 1153306 INR

**Assignment 2 | E-Commerce Case Study**  
**Saurav Kumar (21f1003694)**

5. Draw a bar chart to represent the volume trend with respect to the days of the week in Cochin DC. Using the 15 days data, identify how many units were sold on Fridays?

*Hint: Use data labels*

Answer: 397 units

Assignment 2 | E-Commerce Case Study  
Saurav Kumar (21f1003694)

6. Draw a bar chart to represent the revenue trend in Cochin DC. Using the 15 days data, identify how much revenue was generated on Fridays?

*Hint: Use data labels*

Answer: 2784795 INR

7. Plot a graph to identify revenue trends with respect to the previous day. How much was the revenue growth on the 11th in comparison to the 10th?

*Hint: In the combo chart, use Revenue (INR) in the primary axis, and growth (%) in secondary axis, and add data labels in the growth line.*

Answer: 15.12 %

**Assignment 2 | E-Commerce Case Study**  
**Saurav Kumar (21f1003694)**

**8. Create a ledger for the Cochin DC, and mention the closing stock of F01, M01, and L01 on 15.04.2021.**

**Answer: F01: 93; M01: 22; L01: 55;**

Date	SKU	Opn Stock	In-Transit	Sales	Closing Stock
15/04/21	F01	77	19	3	93
15/04/21	M01	29	7	14	22
15/04/21	L01	60	6	11	55

**9. Calculate the average days of inventory for F04, M04, and L04.**

Assignment 2 | E-Commerce Case Study  
Saurav Kumar (21f1003694)

*Hint: First calculate the average open stock and average sales using the 15 days transactions and compute the average days of inventory.*

Answer: F04: 3.22; M04: 1.61; L04: 2.76;
